## Let's Get Ready for Success

The Pre-ETS Summer Internship Pilot Program emerged as a resounding success! This transformative program provided seven students with a comprehensive 50-hour paid internship experience, designed to equip them with practical skills and industry insights that prepare them for future employment opportunities. Throughout the program, students had the privilege of participating in internships at diverse host sites, each offering a unique and enriching learning experience. The sites encompassed a range of industries, including Advance Auto Parts, a historic hotel focusing on maintenance and housekeeping, Habitat for Humanity, the local library, and various local bakeries.

## Hard Working Man

Meet James. James is a man of many talents and one of the hardest-working people you will ever meet. Why? He has three jobs! James works as a production assistant at OE Enterprises, loading trucks, preparing pallets, packaging, and quality control. His work at OE is both challenging and meaningful. James also works at his local Hardee's and Biscuitville. His responsibilities include environmental service and excellent customer care. James looks forward to coming to work every day and is always sought out by his co-workers when help is needed.

I like making money. I love that people love me, I make friends at work, I know the customers, and I like the people I work with. I help to keep the place clean, that's important, and I'm good at it. I help to get the truck delivery into the store, I really like that, too. I even have been learning new jobs, like frying chicken. It's exciting doing something like that and everyone loves the chicken, so that's a big job. I have three jobs, sometimes I think about getting a fourth. I'm proud of what I can do. ~James
